Summary

Client-facing product consultant with 2+ years supporting enterprise SaaS clients on event-technology platforms (iCapture, Jifflenow). Work covers CRM integration setup using pre-built templates, configuration troubleshooting, and API/log diagnostics with Postman and .HAR analysis (AI-assisted). On personal initiative, designs and ships internal AI agents and browser automations now used across the team, directing AI to generate code against requirements I define. Promoted from Associate to Senior within 18 months. Targeting Solutions / Implementation Engineering roles.

Experience

Senior Product Consultant

Feb 2026 – Present

Cvent, Gurugram, India

- Troubleshoot integration issues for iCapture (Cvent's lead-capture product) across client accounts.
- Set up pre-built templates connecting iCapture with clients' CRM systems (Salesforce, HubSpot, Marketo).
- Use Postman and developer documentation (AI-assisted) to generate expected API responses and validate configurations; analyze .HAR logs to diagnose integration failures.
- Handle product and workflow queries from clients via phone, chat, and email.
- Self-initiated and shipped internal automation tools now used across the team (see Projects).

Associate Product Consultant

Aug 2024 – Jan 2026

Cvent, Gurugram, India

- Onboarded and supported enterprise clients (mid-market and global) on iCapture and Jifflenow.
- Translated client business requirements into platform configurations.
- Set up and troubleshoot integrations between Cvent platforms and clients' CRM tools.
- Promoted to Senior Product Consultant within 18 months.

Associate Product Consultant – Intern

Feb 2024 – Jul 2024

Cvent, Gurugram, India

- Supported enterprise account onboarding and workflow configuration; investigated and escalated product issues with internal teams. Received a full-time offer on completion.

Projects

- **Turf Booking & Operations Platform** (React, Firebase, PWA) — Real-time booking and operations web app for a sports turf business I co-own; defined all requirements and product decisions, directed AI to generate the code, deployed to Firebase. Used daily by four partners. (AI-directed development.)
- **Field-Selection AI Agent** (Glean) — Designed an AI agent (prompt design, data curation, and workflow logic my own) that reads live case context and guides correct Salesforce field selection, reducing errors. Used by 10–15 team members.
- **Email Redrafting AI Agent** (Glean) — Designed an AI agent that rewrites outbound client emails by urgency, importance, and client context. Used by the same team.
- **Chrome Extensions** (JavaScript, Power Automate) — Built two extensions (AI-generated JavaScript, directed and assembled by me): one logging Salesforce case data to SharePoint and notifying stakeholders; one tracking website time with automated Microsoft 365 reports.

Skills

Integrations & Configuration: iCapture, Jifflenow, Salesforce, HubSpot, Marketo, pre-built integration templates, badge API setup, iCapture Real-Time API

API & Validation: Postman (AI-assisted), REST API understanding & validation, webhooks, OAuth (configuration & troubleshooting), developer-documentation interpretation

Troubleshooting: .HAR log analysis (AI-assisted), raw log review, root-cause analysis, cross-functional escalation

AI & Automation: Glean AI agent design, Microsoft Power Automate, JavaScript Chrome extensions (AI-directed), AI-directed web application development

Tools & Communication: Postman, Git, GitHub, Chrome DevTools, Microsoft 365, SharePoint; client-facing technical communication, technical-to-non-technical translation, stakeholder management, customer onboarding

Education

B.Tech, Chemical Engineering — Shiv Nadar University, India

Aug 2020 – May 2024

GPA 7.68 / 10.0

Higher Secondary (ISC) — La Martiniere College, India

2018 – 2019 (87.0%)

Languages: English (Professional), Hindi (Native)
